What Machine Government Is Costing Nevada

In seven years the annual cost of conducting Nevada's state gov ernment has more than doubled. It has increased from \$741,632.84 in 1914 to the enormous sum of \$1,650,639.47 in 1921, an increase of \$909,006.63.

The increase alone is vastly more than the entire operating expenses of the state in 1914.

During the entire period the state government has been under complete and continuous Democratic control.

It is a record of expenditure paralleled by no state and according to the U. S. census department it has made the per capita cost of state government in Nevada the highest of any in the Union.

The following tabulations, taken from the official reports of the State Controller, show the total expenditures made by the state of Nevada since 1911, the first year of the Oddie (Rep.) administration (funds collected by the state for support of county schools are not included):

1911	(Rep.)	entrecesses estatement	\$	732.021.72
1912	(Rep.)			719,187,13
1913	(Rep.)	SILLING THE RESERVE OF THE SECOND SEC		710.086.75
1914	(Rep.)	**************************************		741.632.84
1915	(Dem.)			880,200.31
1916	(Dem.)			790,525,52
1917	(Dem.)			960,805.16
1918	(Dem.)	her in the last of the same and		941.591.11
1919	(Dem.)		ĺ	1.368,921.23
1920	(Dem.)		Ì	1.827.881.98
1921	(Dem.)			1.650.639.47

Where is it to stop? In eight years the cost of the state government has increased 122 per cent in spite of the fact that within that period the population of the state has declined. And from 1914 to 1921 the bonded indebtedness of the state has increased from \$680,000.00 to \$1,669,000.00.

The record cannot be defended upon the ground that these vast expenditures have been made for the construction of highways and for the support of the educational institutions. DEDUCTING ALL THESE COSTS the official records show state expenditures as follows:

> All Highway and Educational Costs Omitted. 1914 (Rep.) \$ 571,498,97 1921 (Dem.) 1.027.596.98

Instead of meeting a loss in population and the trying times of business readjustmet with economy the politicians in the saddle at Carson City have plunged the state government upon a course of extravagance almost beyond belief. With their offices crowded with deputies and clerks and the state institutions loaded with political henchmen the tax burden upon the people has been increased to an extent reachd by no other state in the entire union.

The re-election of the Democratic State ticket means a continuance of these conditions. They have been in complete power for eight years and during this period they have not contributed a single effort toward diminishing the tax burden, but have, on the other hand, steadily increased it.

To stop this appalling waste and reduce the tax burden there must be a complete change in management of state affairs. The entire business of the state is carried on by commissions made up of the various elective state officials, and the officials elected in November will control state expenses during the next four years.

The Republican candidates are pledged to economy and efficiency in State government. They are successful business men and taxpayers, not professional politicians. Elect them to oflice and you will sweep away the extravagant political machine at Carson City that has been running wild for the past eight years.

For the benefit of your own posketbook and the welfare of the state. should there not be a change in management at the state capital?

Republican State Central Committee
